NATIONAL BUREAU OF STANDARDS, Ernest Ambler

Introduction

The National Bureau of Standards was founded in 1901 by an Act of Congress to serve as the nation's physical measurement laboratory. Because currency of information is critical to ongoing research, it is essential that there be a solid technical information support facility. The Library exists to provide this technical information base by serving as a source for both current and retrospective literature in the fields of activity of NBS.

The areas of research at NBS are constantly changing and the scope of the Library collection shifts to accomodate these changes. While the core of the collection remains chemistry, engineering, mathematics and physics, other areas are being developed such as interdisciplinary areas of technology and the social sciences.

Currently, the Library contains over 150,000 books and bound journals. Over 2,500 journals are received.

The NBS Serial Holdings List which follows contains not only the journals currently received by the Library, but also other serials retained in its collection. Although the majority of titles listed are owned by the Library, the holdings of three NBS information centers have also been included.

These information centers are:

The Diffusion in Metals Data Center, National Measurement Laboratory
The Fire Research Information Services, National Engineering Laboratory
The Standards Information Services Section, National Engineering Laboratory

To make the best use of the NBS Serial Holdings List, we urge you to read the "Guidelines for Use" that are given on the following pages. Note especially the diagrams of the physical layout of the Library given on pages v and vi . You are invited to send your comments, suggestions, criticisms, and corrections to Mr. Marvin A. Bond, Chief of the Library's Resources Development and Maintenance Group. Mr. Bond can be reached at (301) 921-3405.

GUIDELINES FOR USE

CONTENTS

This NBS Serial Holdings List includes periodicals, journals, annuals, memoirs, proceedings and transactions of societies, "advances in," "progresses in," and selected conferences and monographs in the collections of the NBS Library and the three information centers listed in the Introduction.

The line(s) below the title indicate which libraries carry this title and what years or volumes they have.

Arrangement of the List

The arrangement of the List is alphabetical. Titles are listed according to the word format used in the publication itself, with the following exceptions:

(1) Articles (such as "The, Die, or La") at the beginning of a title are omitted, as

GESELLSCHAFT DER WISSENSCHAFTEN...
NOT
DIE GESELLSCHAFT DER WISSENSCHAFTEN...

(2) Initialisms and acronyms (such as "IEEE" for the Institute of Electrical and Electronics Engineers) are filed as a group at the beginning of each letter of the alphabet.

(3) Abbreviations for some frequently used words (such as "Amer" for American and "Jour" for Journal) have been used throughout the List in order to conserve space and reduce key punching costs. A complete list of these abbreviations are given on page iv . However, in some instances, these abbreviations have caused a journal title to appear out of what would be its normal alphabetic order if written out. For example, the word association has been abbreviated to "Assn," causing titles beginning with that word to appear before such unabbreviated words as "Associacio."

(4) Proceedings, symposia, transactions, reports, etc. of associations, societies are often listed under the sponsoring agency, as

AMER CHEMICAL SOC ABSTRACTS OF PAPERS

(5) Diacritical marks (such as the German umlaut "¨") are not used; rather letters are substituted, as "für" becomes "fuer."

Location of Materials in the NBS Library

The following pages contain diagrams of the main and mezzanine floors of the Library on which the location of journal shelving and the special collections are indicated. Please consult the table "Title Word Abbreviations, Symbols, and Location Codes Used" on page iv for interpretation of location information given in the List.

In general, the most recent years of a journal are unbound and shelved aphabetically by title. These unbound journals are located:

(1) in the unbound journal section along the main reading area of the Library. The majority of titles will be found here.

(2) in the selected high interest journal section. This section, located near the photo-copier room on the main floor, houses some 80 journals that are of high interest to many Bureau staff. Science is such a title. Only the current year of each journal will be found here; earlier years are shelved with the bound journals.

(3) in one of the Library's special collections, such as Energy or Building Technology. Location codes for these journals are given in the List.

Location information for all journals currently received is posted at the south end of each of the unbound journal stacks.

Earlier years of journals are usually bound and shelved by call number; all years of serials are shelved by call number with the bound journals. The majority of bound journals and serials are located on the main and mezzanine floors of the Library. However, some early and less used volumes are located in the basement in the non-current collection. Location codes for these are given in the List.

Should you experience any difficulty in locating what you need, please ask a reference librarian for assistance. Please also inquire for any journals or serials that have been added since publication of this Serial Holdings List. (Most recent additions can be found in the New Journals Area near photo-copier room.)

TITLE WORD ABBREVIATIONS, SYMBOLS, AND LOCATIONS CODES USED

* = Holdings are incomplete; see main catalog to determine missing items
** = Recent issues will not be found in unbound journals area; these are shelved with the bound volumes or in special collections
AMER = American
ASSN = Association
BASE = In NBS Library's Non-Current Collection in the basement; filed by title (inquire at the Reference Desk)
BT = In NBS Library's special Building Technology Collection
BULL = Bulletin
C = Continued as (refers to a later title of the publication)
EGY = In NBS Library's special Energy Collection
F = Former title of the publication
IGA = In NBS Library's special Intergovernmental Affairs Collection
INST = Institute
INTERN = International
JOUR = Journal
M = Some or all holdings are in microform
SNBS = Material located in the Main Library, E Wing, Administration Building
Reference Librarians, 921-3451; Interlibrary Loan, 921-3410
NCC = In NBS Library's Non-Current Collection; filed by call number (inquire at the Reference Desk)
SDMDC = Diffusion in Metals Data Center Collection (NML)
Roseann Hayes, Room A-155, Materials Building, 921-3356
SFRIS = Fire Research Information Services Collection (NEL)
Nora Jason, Room B-251, Polymer Building, 921-3246
SSIS = Standards Information Service Collection (NEL)
William Slattery, Room B-155, Technology Building, 921-2587
PROC = Proceedings
REF = In NBS Library's Abstracts or Reference Collection
REV = Review
SOC = Society
TRANS = Transactions
U S = United States (filed as an initialism)
V = Volume

INTERGOVERNMENTAL AFFAIRS COLLECTION (IGA)

PURPOSE

The IGA collection serves as a source of legal authority for the work of the Office of Legal Advisor and other organizational units requiring access to the law. It also provides information about the work of Congress and regulatory and administrative actions relevant to NBS activities.

HISTORY

Originally, the legislative reference service in the NBS Library was designed to bring current and proposed legislation and regulations of interest governing or concerning the operation of the Bureau to the administrative officials of the Bureau. In 1977, these services were expanded to a more complete service including legal source materials, as well as information concerning state and local governments. Because of this expansion of interests, the collection became known as the Intergovernmental Affairs Collection (IGA).

PHYSICAL LOCATION

The IGA collection is located in the NBS Library on the mezzanine, next to the Building Technology Collection and adjacent to the study area (see diagram).

☐ Document describes a computer program; SF-185, FIPS Software Summary, is attached.

11. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here)

This publication contains holdings information for approximately 4600 titles representing current and noncurrent journals, periodicals, annuals, memoirs, proceedings, and transactions. The holdings of the NBS Library and 3 collections specializing in fire research, standards, and diffusion in metals are represented.

12. KEY WORDS (Six to twelve entries; alphabetical order; capitalize only proper names; and separate key words by semicolons)

Annual reports; journals; library holdings, NBS Library; NBS periodicals; periodicals; proceedings; serials; transactions; fire; diffusion in metals; standards.
